

Bug Prediction Model - Maxwell QA Lab

November 11, 2016

Kyle Bray, Maxwell Platform QA Manager

About Schlumberger

- Schlumberger is the world's leading provider of technology for reservoir characterization, drilling, production, and processing to the oil and gas industry.
- Working in more than 85 countries and employing approximately 100,000 people who represent over 140 nationalities.
- Schlumberger supplies the industry's most comprehensive range of products and services, from exploration through production and integrated pore-to-pipeline solutions for hydrocarbon recovery that optimize reservoir performance
- Our mission is to provide integrated workflows and solutions that give our stakeholders competitive advantages to serve our clients.

Maxwell and Bugs

Maxwell Bug Prediction - Problem

12 Million Lines of Code, Single developer does not know full details of code interaction / dependencies

> 100 changesets per week, requires significant testing and analysis

Maxwell automation test coverage low, ~50%
Manual test limited and time consuming

Maxwell Bug Prediction - Solution

Bug Prediction Model:

- Predict which change sets are more likely to cause a bug so we can focus our testing efforts on these.
